Interoperable **Fire / EMS** Template for Neighbor Systems / Agencies

Our template and talkgroup names are normally formatted for ten-character displays using "BC" to identify Butler County common talkgroups.

OPTION: Depending on your local radios (some support a maximum of eight characters), we have included optional layouts for eight characters.

OPTION: Depending on your local radios (some support a maximum of eight characters and use two characters for the zone), we have included optional layouts for six characters.

OPTION: If "BC" would be confusing based on your situation, we have included options to use our county number, 09, in place of the BC.

OPTION: If your radio is not Motorola ADP capable, the secure talkgroups can be omitted.
